

# Something Old, Something New, Something that will make Money for You!

For over 50 years, Monmouth has been bringing value to companies with closed cell sponge rubber and plastic foam raw materials.

## CHRYSLER TAIL LIGHT

### A Chrysler Problem – A Monmouth Solution

DURAFOAM™ C191XLDS 100% EPDM

C191XLDS was the first low density closed cell EPDM – 1970's. In 1979 most sponge EPDM was heavily loaded with oil and filler to lower the cost, we put air in and solved the problem. **WE CAN DO THE SAME FOR YOU!**

In 2016, Monmouth has done it again. Developed in its research & testing lab in Long Branch, NJ, Monmouth has introduced a 100% low density EPDM that can be thermoformed and is available in a variety of colors. This family of materials will be our [P1920LDTF](#) series manufactured to ASTM-D-1056 standards.

**IMAGINE WHAT A 100% THERMOFORMABLE EPDM  
WILL DO FOR YOU AND YOUR CUSTOMERS!**
