

MANUFACTURER OF
CLOSED CELL SPONGE RUBBER
& PLASTIC FOAM

OCTOBER 2016

**PRODUCT DECLARATION & CERTIFICATION TO
STATE OF CALIFORNIA PROPOSITION 65
Updated Listing October 21, 2016**

This is to certify that the products manufactured by Monmouth Rubber & Plastics Corp., including Durafoam™ Closed Cell Rubber & Plastic Foam; Duraflex™ Solid Rubber & Plastic Sheeting; and Bondaflex™ Recycled Rubber & Plastic materials, contain in some instances ingredients considered toxic under California Proposition 65 The Safe Drinking Water and Toxic Enforcement Act of 1986.

Some of the ingredients in Monmouth’s products fall under the No Significant Risk Levels (NSRLs) for Carcinogens and the Maximum Allowable Dose Levels (MADLs) for Chemicals Causing Reproductive Toxicity. It should be noted that the chemicals at risk contained in Monmouth’s products are encapsulated and fully vulcanized. As long as the material is not exposed to conditions other than those recommended per Monmouth’s Physical Properties Charts such as temperature, flame etc., those ingredients maintain their encapsulation in the cured product.

Customers using Monmouth’s products in the State of California are responsible for declaring the above information and following the laws and regulations of the State of California as required by Proposition 65 and all other California local and state agencies.

Included in the customer’s responsibility is the proper storage, usage and disposal of Monmouth’s products consistent with all the laws and regulations of the State of California.

Monmouth Rubber & Plastics makes no representation either expressed or implied that its products are safe or acceptable where products are used in applications over which Monmouth has no knowledge nor control.

Per the OEHHA, the following is offered for your information only and is not a representation in any other respect. A Proposition 65 warning does not necessarily mean a product is in violation of any product-safety standards or requirements. Proposition 65 applies only to exposures to listed chemicals. It does not ban or restrict the use of any given chemical nor the products which contains those chemicals.

For further clarification on the use of our products in the State of California, please direct any additional questions in writing to John M. Bonforte, Sr.

**ISO CERTIFIED 9001:2008
CERTIFICATE #US08/5033**
